Automated Guided Vehicle solutions are an extremely safe system with reliable operation. The AGV’s advanced safety & sensing systems ensure there are no damages to products, buildings or machinery. In addition, work safety & productivity improve significantly.
AGV Advantages

**Implementation**
» Easy implementation, minimal modifications to existing buildings with no additional fixed structures needed.

**Operation**
» No damages to customers products, buildings or equipment. Reliable 24/7 operational capability with traceable, properly identified product movement.

**Labour Efficiency and Safety**
» Dramatic increase in plant operational safety. AGV’s safety/sensing systems ensure there are no damages to products, buildings, machinery or staff.

**Maintenance and Modifications**
» Logistical flexibility allowing easy updates and modifications. Localised 24/7 service through SCOTT’s extensive service network.

**Cost Efficiency**
» By automating whole or part of the process impressive cost savings can be achieved in logistics operation. The payback time of an automated system is very short, especially when working in shifts. Labor costs can be reduced, or workers can be released to more productive tasks. An automated system is in operation 24/7 with no interruptions to the process. It is also possible to rent an automated system, so no capital is tied up in investment.

**Safety and Environment**
» AGV solutions are an extremely safe system with reliable operation. With advanced safety features there are no damages to products, buildings or machinery. In addition, safety improves significantly on the work floor.
