

BLADESTOP CONNECT

Data Collection Package

BladeStop launches the new BladeStop Connect to bring operational data to its leading band saw technology.

- Real time and historical data showing productivity status and operational log.
- BladeStop Connect available for both previously installed and new BladeStop systems*
- Data easily accessed by both operations and management from any local intranet connected device.
- Configured with unique individual operator log-in for detailed shift reporting

*ask your SCOTT representative for more information on this and all BladeStop options
